

## [Retrieving Scriptures From Publications In The WT Library](#)

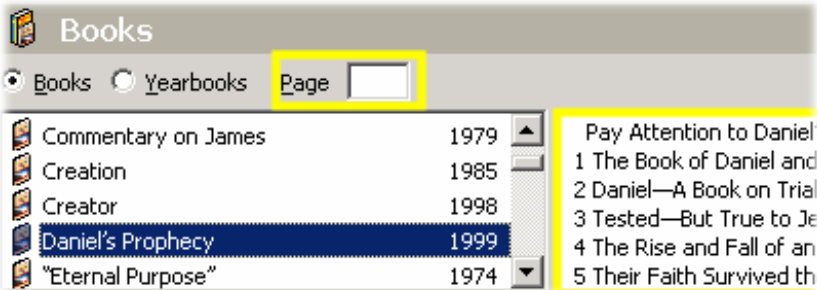

Many of our books are already on the WT CD-Rom. Rather than spend time creating scripture lists for these publications, our brothers have made it possible to easily extract scriptures from publications that are available on the WT Library.

See the instructions below:

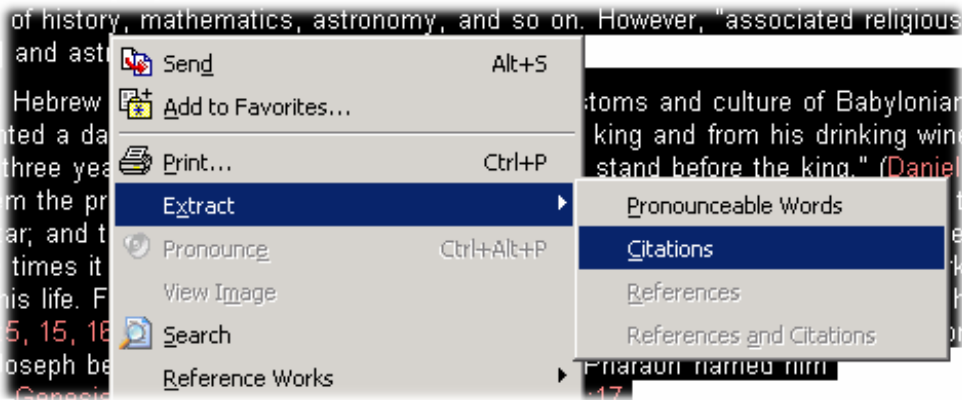

Go to your WT Library; select **Books** from the right-hand column:

Select the desired publication from the list and select the chapter or type in page number of current study:

Once the lesson is displayed in the contents window, highlight the exact paragraphs to be covered in this week's study. Right-click on the highlighted text and select **Extract > Citations**:

All the scriptural citations will then be listed in the contents window for printing.
